

GRADUATE OPPORTUNITIES IN PROBABILITY

- A PhD programme with fully funded research studentships

- Enhanced studentships available in the CDT in Communications, projects involving randomised algorithms, random geometric networks and information theory

www.maths.bris.ac.uk

University of BRISTOL

Who we are

A strong and growing probability group with links to Analysis, Combinatorics, Engineering, Mathematical Physics, Random Matrix Theory and Statistics.

Our research

Broad interests, including: stochastic processes with long memory, evolutionary biology, information theory, interacting particle systems, networks and processes on graphs, scaling limits, statistical physics, find out more...

Living in Bristol

Sunday Times Best City in the UK

Applications considered year-round, but apply by 31st January 2015 to be considered for a PhD studentship
